

Hestia Settings — Tester Guide

29 September 2026 · Settings Phases 1–4 (profile, shifts, breaks, hotel & cleaning credits)

This guide walks you through every part of the new Settings area in the Hestia app: what each screen is for, the steps to test it, and what you should see. Tick each box as you go and note anything that does not match.

Before you start

You need the latest Hestia development build and two test accounts, one of each kind below. Ask the project lead for the logins; they are not in this guide.

Account	Example	Why you need it
Manager	Executive Housekeeper (e.g. Henry Tankeu)	Sees and changes the manager screens: Shifts & breaks, Cleaning credits, Hotel
Room attendant	Housekeeping Room Attendant (e.g. Amara Okafor)	Checks what ordinary staff see, and that manager screens stay hidden

- Use a real phone where possible. Push notifications and the camera do not work on the iPhone simulator.
- Test data is shared by everyone. If you change a shift's hours, a break or a cleaning credit, change it back when you are done, and say so in your report.
- Most screens refresh when you come back to them, and you can pull down to refresh by hand.

Reporting a problem. Note the check that failed, which account you used, your phone model, what you did, what you expected and what happened. Attach a screenshot if you can.

How Settings is laid out

Settings is the last tab in the bottom bar. Everyone sees the top and bottom of the screen; the Management section appears only for managers.

Screen	How to get there	Who sees it	What it is for
Profile card	Top of Settings	Everyone	Your photo, name, job title and department; tap it to open My Profile
My Shift card	Under the profile card	Everyone on a shift	Today's shift hours, whether you are on shift now, and your breaks
Shifts & breaks	Settings › Management	Managers	Shift hours, break rules and who works each shift
Cleaning credits	Settings › Management	Managers	How long each room type should take to clean
Hotel	Settings › Management	Managers	Hotel name and time zone
My Profile	Settings › Account	Everyone	Change your photo, name and phone number
Change Password	Settings › Account	Everyone	Set a new password
Language	Settings › Account	Everyone	English, Français, Deutsch or Italiano
Push Notifications	Settings › Notifications	Everyone	Shows whether this phone may alert you, and opens the phone's settings
Version, Hotel	Settings › About	Everyone	App version and hotel name
Sign Out	Bottom of Settings	Everyone	Signs you out after a confirmation

Part 1 — Profile, password, language and notifications

Everyone can change their own photo, name and phone number. Job title, department, shift and hotel are shown but only a manager can change them. Test this part with both accounts.

Settings screen

- ☐ Open the Settings tab. The profile card shows your photo (or initials), name, and job title · department.
- ☐ Pull down on the screen. It refreshes without errors.
- ☐ Tap the profile card. My Profile opens.

My Profile

- ☐ The screen shows your photo, name and job title, then Personal details (Full name, Phone, Email) and Work (Job title, Department, Shift, Hotel, Member since).
- ☐ Work says "managed by your manager" and none of its rows can be edited.
- ☐ Change your name. A Save button appears at the top right and a Save changes button at the bottom.
- ☐ Clear the name completely. The error "Your name cannot be empty." appears and Save is disabled.
- ☐ Type a phone number such as +41 79 123 45 67 and save. You see "Saved" and the number is still there when you reopen the screen.
- ☐ Type letters into Phone. The error "Use digits, spaces and + () - only." appears and Save is disabled.
- ☐ Change your name, then tap Back without saving. You are asked "Discard changes?". Keep editing stays; Discard leaves.
- ☐ After saving a new name, go to Home. The new name shows there too.

Profile photo

- ☐ Tap the photo (or Change photo). A menu offers Take Photo, Choose from Library and, if you have a photo, Remove Photo.
- ☐ Choose from Library, crop the square and confirm. You see "Photo updated" and the new photo appears on My Profile and Settings.
- ☐ Take Photo with the camera. Same result. The first time, the phone asks for camera permission.
- ☐ Remove Photo. Your initials show instead.
- ☐ Deny photo access in the phone's settings, then try again. You see a message asking you to allow access; the app does not crash.

Change Password

- ☐ Settings › Change Password opens a sheet with Current password, New password and Confirm new password.
- ☐ As you type, "At least 8 characters" and "Both new passwords match" tick green. Save is enabled only when all three are filled and both ticks are green.
- ☐ Show passwords reveals what you typed; Hide passwords hides it again.
- ☐ Enter a wrong current password and save. You see "Your current password is not correct." and stay on the sheet.
- ☐ Enter the right current password and a new one. You see "Password changed", the sheet closes and you stay signed in.
- ☐ Sign out and sign in with the new password. It works; the old one does not. Change it back afterwards.

Language

- ☐ Settings › Language shows your current language. Tap it and pick another. The row updates.
- ☐ Sign out. The login screen is in the chosen language. Switch back to English when done.

Push Notifications

- ☐ The row says On, Off or Not set up.
- ☐ Not set up: tapping it asks for permission.
- ☐ Off: tapping it opens the phone's settings for Hestia. Turn notifications on, come back, and the row says On.

Sign Out

- ☐ Tap Sign Out. You are asked to confirm. Cancel keeps you signed in; Sign Out returns you to the login screen, and swiping back does not reopen the app.
- ☐ If your session expires (for example after a long time away), the app returns to the login screen with "Your session has expired. Please sign in again." and no red error pop-up.

Part 2 — Shifts

The hotel has three shifts: AM (06:00–14:00), PM (14:00–22:00) and Night (22:00–06:00, running overnight). Everyone sees their own shift on Settings; managers change the hours and who works each shift.

My Shift card (both accounts)

- ☐ Settings shows a My Shift card under the profile card, e.g. "MY SHIFT · AM — 06:00 – 14:00".
- ☐ During the shift it says "On shift now" in green with "Ends at 14:00 · in 1h 40m". The countdown updates while the screen is open.
- ☐ Before the shift it says "Starts in ..."; after it, "Off shift · Next shift tomorrow ...".
- ☐ Someone with no shift sees no My Shift card.

Shifts list (manager)

- ☐ Settings › Management › Shifts & breaks opens the Shifts screen.
- ☐ There is one card per shift: its name, hours in large type, length (8h), number of people and their avatars. The shift running now has a green "Now" badge.
- ☐ The Night card shows "+1 day" after its hours.
- ☐ A "Not on a shift" card at the bottom shows how many staff have no shift.

Changing shift hours (manager)

- ☐ Open a shift. Hours shows Starts and Ends.
- ☐ Tap Starts. A time wheel opens with hours and minutes (5-minute steps). Under it, a preview such as "14:00 – 22:00 · 8h".
- ☐ Pick a new time and tap Save. You see "Hours saved" and the new time on the screen and on the Shifts list.
- ☐ Set start and end to the same time. The preview says "Start and end cannot be the same." and saving shows an error.
- ☐ Set an end earlier than the start (e.g. 22:00 to 06:00). The preview says "overnight" and the note under Hours explains it ends the next morning.
- ☐ Put the original hours back when done.

Moving staff (manager)

- ☐ The shift's staff list shows each person's name, job title and department. With more than 6 people there is a search box; search by name or job.
- ☐ Tap a person. A menu offers "Move to ..." for each other shift and "Remove from shift".
- ☐ Move someone. You see "... now on the PM shift." and they leave this list and appear on the other shift.
- ☐ Remove someone from a shift. They appear under "Not on a shift".
- ☐ Tap Add staff (or the person-plus icon at the top). A list of everyone not on this shift opens, each showing where they are now ("now AM", "no shift"). Tick two people and tap Add 2. Both join the shift.
- ☐ Signed in as a moved attendant, their My Shift card and My Profile show the new shift.
- ☐ Put everyone back on their original shift when done.

Part 3 — Breaks

Managers decide which breaks each shift allows; staff start and end their own breaks from the My Shift card, and their team sees them as on break. The AM shift already has two breaks on the test data: Lunch (30 min, 11:00–13:00) and Coffee break (15 min, any time).

Setting break rules (manager)

- ☐ Open Shifts & breaks › a shift. A Breaks section lists each break with its length and window, e.g. "Lunch · 30 min · 11:00–13:00", and an Add break row.
- ☐ Tap Add break. Pick a name (Lunch, Coffee break, Dinner, Rest) or type one, a length (10 min to 1h) and When: Any time, or Between two times.
- ☐ With Between chosen, tap From or Until. A time wheel opens under the buttons.
- ☐ The summary line under the form reads back your choice, e.g. "Dinner · 30 min · between 18:00 and 19:00". Save adds it to the list.
- ☐ Clear the name. Save is disabled and the summary says "Give the break a name."
- ☐ Tap an existing break. The form opens filled in, with a Delete break button. Delete asks for confirmation and removes it.
- ☐ A shift with no breaks shows the note "No breaks set: staff on this shift can still take a short 15-minute break."

Taking a break (attendant, during their shift)

- ☐ The My Shift card shows a Breaks list. A break whose window is open has a Start button; one not open yet shows "From 11:00", greyed out.
- ☐ Tap Start. You are asked "Start Lunch (30 min)?" . Start break confirms; Not now cancels.
- ☐ After starting, the card turns amber: "On break", the break's name, a countdown ("30 min left"), "Started 12:23 · back by 12:53" and an End break button.
- ☐ The countdown goes down while the screen is open. Past the planned time it turns red and says "... over".
- ☐ Tap End break. You see "Welcome back." and the break now shows "Taken 12:23–12:40" with a green tick. It cannot be started again today.
- ☐ On a shift with no breaks set, the card offers a 15-minute Short break instead.
- ☐ Outside your shift the Breaks list is not shown.

Seeing who is on break (manager, while the attendant is on break)

- ☐ Shifts & breaks › their shift: the attendant has an amber "On break" chip in the staff list.
- ☐ Staff tab: the attendant appears under On Break.
- ☐ Open any room › Reassign. The attendant shows "On break · back 12:53" under their job title.
- ☐ After they end the break, all three go back to normal (pull to refresh if needed).

Part 4 — Hotel and cleaning credits

Both screens are for managers. A room's cleaning credit is the time its In Progress countdown runs against ("32 min left", then "8 min late"). The hotel's time zone is the one used for times written into notifications.

Cleaning credits

- ☐ Settings › Management › Cleaning credits lists every room type (JS1KT, RO2KT, ...) with its number of rooms and its time, and the total at the top ("18 room types · 40 rooms").
- ☐ Where the rooms of one type differ, the time shows as a range in amber, e.g. "45–60 min", with "Rooms differ".
- ☐ Tap a room type. A sheet shows its rooms and current time, a large minutes value with – and + buttons (5-minute steps) and quick choices from 30 min to 2h.
- ☐ The button reads "Apply to 6 rooms" (or "No change" if nothing changed). Tap it. You see how many rooms changed, and the list now shows one time for that type.
- ☐ Open the Rooms tab and set a room of that type to In Progress. Its countdown starts from the new time.
- ☐ Put the original time back when done (note it before you change it).

Hotel

- ☐ Settings › Management › Hotel shows the hotel name and the time zone, with the time there now (e.g. "Africa/Douala · 12:39 now").
- ☐ Change the name. A Save button appears. Clear it and you see "The hotel needs a name."
- ☐ Tap the time zone. A searchable list of cities opens, grouped by region, each with its current time. Search for "Zurich", pick it, and it replaces the old zone.
- ☐ Save. You see "Saved". The new name shows under Settings › About › Hotel and on My Profile.
- ☐ Change something, then tap Back without saving. You are asked "Discard changes?".
- ☐ Put the original name and time zone back when done.

Permission checks

Sign in as the room attendant and confirm they cannot reach manager screens or change what their manager controls.

- ☐ Settings shows no Management section.
- ☐ My Profile: Work rows (job title, department, shift, hotel) cannot be edited.
- ☐ The attendant can change their own name, phone and photo, and these save.
- ☐ Break rules cannot be added or edited; the attendant can only start and end their own breaks.
- ☐ If a tester has a link to a manager screen (e.g. Shifts), opening it as the attendant is refused rather than showing the screen.

Known limits

These behave as designed for now. Note them only if they get in your way.

- Shift names (AM, PM, Night) cannot be changed and new shifts cannot be added.
- Shift hours are the same every day; there are no weekend patterns.
- Starting a break does not pause a room that is In Progress, so break time still counts against that room's cleaning time.
- Nobody is notified when a break runs over.
- There is no Help & Support row yet.
- The new Settings screens are in English only; the language setting changes the login screen and other translated parts.

- Push notifications need a real phone. Android push is not set up yet.
